Projects

Major Work-Related Projects:

- Creation of the Integrated Tawi-Tawi Regional Agricultural College Management System (iTRACMS)
  - Designed and created the all-in-one management system for the local state college which included admission, enrolment, and other various essential services of the college.
  - Created a complementary website which acts as student portal for students' to access their grades on-line.
  - Conducts scheduled ICT seminar to boost ICT capability of college employees and also students.

- Creation of the Integrated Vaccination Recording System for the Integrated Provincial Health Office Tawi-Tawi
  - Designed the COVID19 Vaccination Record Card being used in the Province of Tawi-Tawi.
  - Created a web-based system for the online recordkeeping of vaccinated people in the province.
  - Supported Rural Health Unit focal persons on implementation of the system on the field.
  - Established help support via website, e-mail, social media, and mobile phone for vaccination record queries of the general public.

- Supervision of a unified server LAN-based internet connection of sub-offices of IPHO Tawi-Tawi
  - Spearheaded the connection to the internet of the key sub-offices.
  - Connected key sub-offices to a unified server and manages the said server.
  - Proposed and heads an ICT unit as technical support to other staff having difficulties with IT-related equipments.

Major Software Development Projects:

- SMS Notification System for Tawi-Tawi Regional Agricultural College (*Testing Phase*)
  - Designed and created a vb.net-based application software for a local college to use for automatic schedule notification of students enrolled and registered using a third party SMS API.
  - Shall automate the dissemination of yearly schedules for each courses, to the enrolled students. It will help them be notified about upcoming important events such as Examinations, Orientations, etc.
  - Shall help students living in far-flung remote areas, without internet connection, to receive updates via SMS, given that text & call reception is available in their area.

- Library Management System for the College Library of Tawi-Tawi Regional Agricultural College (*Testing Phase*)
  - Designed and created a vb.net-based application software for automated management of the public library of a local college in Tawi-Tawi.
  - Assists the librarian and the library staff with the use of computer-based book inventory and searching.
  - Created a much reliable computer-based transaction recordkeeping for book borrowing.

- Tausuga! - a cross-platform mobile quiz game for elementary kids learning Bahasa Sinug
  - Designed and created an Android and Windows quiz game for local elementary school pupils learning the main dialect in the Province of Tawi-Tawi with the aim of making learning much more fun for kids.
  - Consulted with various dialect experts in making sure that the information being used in the game are all accurate and correct.

- Aturan Pagsambahayang - a mobile application on how to perform Islamic Prayer in Bahasa Sinug
  - Designed and created an Android application for Tausug people on how to correctly perform the Islamic Prayer (Salah) in local dialect together with illustrations and rulings proofread by the Islamic authority of the Province of Sulu.

Major Graphic Design Clients:

- Notre Dame of Jolo College
  - Designed the latest logo for each college department while also creating graphic works during the first ever Notre Dame of Jolo College eSports Tournament.
  - Designed magazines, advertisements and created video and motion graphics for various programs and college advertisements.

- Local Government Unit of Sapa-Sapa Municipality
  - Created designs for various programs supported by the local government unit such as sporting events, medical mission, information drive, and many more.
  - Worked closely with a supported youth-oriented organization from branding to information dissemination through social media posts and printed materials.
  - Also worked closely with the local health unit in bringing correct information to the mass especially those in the far flung islands. Also designed the official seal being currently used by the unit.
